

## GENERATORS & POWER DISTRIBUTION

Electrical power is critical to our nations infrastructure, and as we all know the United States has seen it's share of natural disasters in recent years from hurricanes and tornadoes to fires and floods affecting all of our daily routines, not to mention the huge cost to business and industry.

Now you can rely on Stewart's Mobile Concepts to assist you with mobile generators and power distribution for emergencies, back up power, standby power, large events, remote sites, and more. We offer nationwide delivery, with local service, and maintenance for all your power generation needs. Our power equipment is available for short term and long term rental applications. Trust in our experience, knowledge and the best equipment in the industry to give you power and keep you up and running 24/7!

From 6.5kw portable generators up to 2,000kw industrial generator trailers we can have your power needs immediately covered!

### UNIT SIZES

Please inquire for any size or type of unit not shown.

### TOWABLE SILENCED DIESEL GENERATORS (RANGING FROM 20KW - 320KW)

At SMC, we offers a complete line of sound attenuated generator rentals for remote site power or emergency back-up. Features include a microprocessor based controller with automatic safety shutdown, emergency stop switch, lug box protection, voltage selector switch, multiple outlets, and automatic remote start for standby applications. Voltage regulator controls the voltage to within 1%. Large fuel tanks are built into the skid allowing long operation on or off highway legal trailer. Generators are equipped with a single point lifting eye. Skid mounted units are also available.

### INDUSTRIAL MOBILE GENERATORS

When your job requires mobile site power or emergency back-up, Stewart's Mobile specializes in Industrial utility grade silenced diesel generator rentals ranging from 25 to 2000 kW. These multiple voltage units are mounted to highway legal trailers. They have long run times, many greater than 24 hours at full load on one tank of fuel. All units are housed in sound attenuated enclosures for quiet operation. Units with environmental containment are also available upon request.

Please contact us for a complete list of specifications, size, weight, fuel capacities, consumptions, etc. for any of our units, and we will match you with the right equipment.

Fuel Tanks, Power Distribution Systems, Transformers, Electrical Cable tie-ins and extension sets are also available for short term and long term rentals.
