

MOBILE SINK UNITS

Containerized for durability, each unit provides 16 individual basins with hot and cold running water, climate control and interior lighting.

Designed from the ground up with field conditions in mind, these units are plug-and-play and can easily adapt to existing municipal water and sewer systems. In areas without infrastructure, tanks can be provided for both fresh water and gray water storage.

Units can be operated independently or combined with additional sink units to support larger events. They can be positioned on the ground or left on the chassis for added flexibility. Portable sink units are ideal for military exercises, special events, tours, remote sites or emergency situations.

UNIT DETAILS

- Sinks: 16
- Water Heater: 100 Gal. - LP Gas or Electric
- Water Inlet: Garden Hose
- Weight: 8,000 lbs.
- Footprint: 8' x 20'
- Power: 50A 220V Plug
- HVAC: 1-Ton Heat/ AC Unit
- ISO Certified for rapid worldwide deployment and are transportable by truck, rail, ship, helicopter, or cargo plane.
- Heavy duty steel construction and rugged design enable units to withstand Category 5 winds of 155 mph with proper anchoring.
- Units are perfect for short-term and long-term rental situations.
- ISO 9001:2008 Certified
